

**Role:** Analyst Intern

**Location:** Columbus

**Job Type:** Summer Intern

**Experience Level:** N/A

**Company:**

Horizon Two Labs (H2L) is a venture studio that conceives, develops and operates startups. We partner with large enterprises to form joint ventures that leverage the knowledge, resources, and intellectual property of the enterprise with the execution and entrepreneurship of the studio.

The H2L startup studio creates joint ventures with corporates across a wide variety of industries but we are also continually testing our own internal ideas through our 4 step process of validate, design, build and scale. Through our studio fund, our goal is to create 1 new validated startup per quarter that takes an idea from 0 to a midwest Pre-A funding round.

Our core venture studio team is made up of serial entrepreneurs, hackers, hustlers and creatives who like to build cool shit that solve real problems.

Currently, H2L builds fintech companies and online marketplaces.

**Values:**

- Never stop learning
- Put the customer first
- Embrace the problem
- Question the status quo
- Roll up your sleeve mentality
- Ask forgiveness rather than permission
- Results driven aka get shit done
- Judged on merits of work
- Invest, don't spend
- Test everything

**Culture & Philosophy:**

H2L is an entrepreneurial minded team that falls into 3 archetypes: hackers (engineers), hustlers (sales and marketing) and hipsters (creatives). We all believe in a never stop learning mindset where our work speaks for itself.

We search markets to identify the horizons of innovation with the goal of continuously defining adjacent possibilities. Our goal is to always put the challenges of the customer first and build great products that solve real problems.

**Perks:**

- Flexible, fun and fast-paced work environment
- Ability to work remotely as needed
- Opportunity to build a market-leading solution from the ground-up
- Opportunity to expand your network, knowledge, and capabilities
- Opportunity to foster an entrepreneurial mindset with the support of the venture studio
- Mentorship from proven serial entrepreneurs and enterprise leaders
- Unlimited PTO
- Education on the process of building a startup

**Responsibilities:** Work with a product team or venture studio startup on validation, market research, product feature design and testing, or early business development and customer acquisition. Project work is dependent on needs determined at the time by individual product managers.

**Attributes:**

- You're a self-starter
- You're result driven
- Detail-oriented with the ability to multitask and prioritize
- In a team setting, you understand how to navigate disagreements, and commit.
- You have strong written and verbal communication skills—particularly with keeping stakeholders aware of project status.
- You have a flexible approach to work —operating proactively in a fast-paced (often chaotic), evolving atmosphere with ambiguous structures.
- You recognize transparency with team members as a means to iteratively deliver more valuable work, together.
- You love to learn, and apply what you learn.

**Requirements:**

- Superior problem-solving skills with the ability to think strategically and decide pragmatically
- Ability to quickly manage and adapt to changing tasks and priorities
- Ability to work with remote teams
- Highly analytical with excellence at leveraging customer research to drive product decisions
- Working knowledge of Google Suite/Drive, Slack, Asana, Github, and other project management tools
- Passionate about taking ideas from 0 to 1 and beyond.
